

- **Compatibility with back-connect motherboards**
- **Tempered glass side panel**
- **4x pre-installed A-RGB Fans**
- **A-RGB control hub with M/B sync and PWM fan speed control**

The **CHIEFTEC Hunter 3** builds on the success of the original Hunter 2 gaming case with a completely new design featuring a wider chassis built from thicker materials, improved radiator support, while accommodating the latest back-connect motherboards (ASUS BTF and MSI Project Zero compatible).

The optimized internal layout supports the mounting of 360 mm radiators in the front and on the top and CPU tower coolers up to 178 mm in height. High-end GPUs up to 425 mm can be easily accommodated, thanks to its spacious and well-ventilated configuration.

The Hunter 3 comes with 4 pre-installed A-RGB fans connected to a control hub that allows for M/B sync and fan speed control. With a perforated steel front panel and overall clean, linear design, CHIEFTEC Hunter 3 is ready to support modern gaming systems in a timelessly elegant chassis.
