DC, 802.3at/af, or Passive PoE Powering

In addition to the traditional DC power jack, the Gigabit PoE port enables data and power delivery through a single Ethernet cable, using power from a PoE switch, PoE access point controller, or PoE injector.

Captive Portal and Multi-SSID

Captive Portal allows popping up a welcome or validation page when users connect. Multi-SSID creates multiple Wi-Fi names for different tasks and improves security.

Seamless Coverage with Cudy Mesh

Connect AP to a Cudy AC/Mesh device to set up instantly and enable the fast roaming feature, allowing clients to move freely between Wi-Fi zones without switching networks.
