System Overview

DH-AC Series wireless Access Controller (AC) is well designed and positioned for SME network. It features gateway and AC function integration, reducing the number of devices and TCO in network. It comes with the standard granular user control management, comprehensive RF resource management, 7 × 24 wireless security control, fast layer-2 and layer-3 roaming, strong QoS and IPv4/IPv6 dual stack. When paired with DH-AWA Series Access Point (AP), it serves as an ideal access control solution for WLAN access of SMB network.

Functions

Minimal WEB

Designed with a minimalist graphical WEB, easy to operate, which improves configuration efficiency.

Multiple Management Methods

Supports multiple management and login methods such as WEB, CLI, SNMP, SSH, and Telnet.
